

PANGEA INSURANCE

TEAM UP WITH

CORNERSTONE
BUILDING SURVEYORS

IN PROVIDING
REINSTATEMENT COST ASSESSMENTS

Both Hampshire-based companies are working together to assist local businesses in ensuring they are correctly covered.

For many business owners, keeping on top of their assets can be both complex and time-consuming. Whether it's one property or multiple, there are plenty of factors to consider, especially when it comes to insurance.

Given the recent inflationary rises the reinstatement costs of buildings have increased dramatically. Taking into consideration the rise in cost of materials, increased labour rates, which all have a big factor in building a property.

OUR PARTNERSHIP

As part of Pangea Insurance Brokers' service, the team of advisors will require a range of details regarding the assets you want to insure, such as security measures, staff information, and of course, rebuild costs...

This is where Cornerstone Building Surveyors come in.

To accurately determine the cost of rebuilding a property to its previous state, the experts at Cornerstone will assist in carrying out a **Reinstatement Cost Assessment (RCA)** for clients.

The purpose of this is not only to protect business owners in the event of substantial damage to their property or even a total loss, but to financially protect them from being **under-insured**.

A BIT ABOUT US

[Pangea Insurance Brokers](#) is a trusted, independent brokerage that specialises in commercial insurance and financial protection for businesses of all sizes. With a knowledgeable team of specialists on hand, Pangea provides guidance on all forms of insurance, from Contractors to Property Owners.

[Cornerstone Building Surveyors](#), based in Fareham, provides independent advice to their clients, offering a full range of commercial building surveying services for both the private and public sectors. The service can be for clients when purchasing or leasing a property, or for ongoing advice on existing buildings.

A modern office space with several white desks and black ergonomic chairs. Large windows in the background offer a view of a city skyline. The floor is covered with a dark, patterned carpet. Orange geometric shapes are overlaid on the top-left and bottom-right corners of the image.
